## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Claim Rejections - 35 USC § 112***

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The limitation "all the substances in each channel will be released simultaneously at one end when the housing is broken open at the scores" is considered to be new matter", i.e., the specification does not disclose structure that would necessarily perform such a function. For example, the two substances could have different viscosities which would prevent "simultaneous" release or the substances and the channel are configured such that the tubes need to be squeezed in order for the material to be released and therefore pressure on one side of the housing may release a substance in one channel, but not the other.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not enable the limitation of each channel extending through the length of the housing, i.e., ends 5 and 6 are part of the housing and the channels do not extend through those ends. Further, the specification does not enable the limitation of the channel being sealed with a score. The specification discloses that the channels are sealed at the ends 5 and 6 but does not disclose that the scores "seal" channels.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Weidner, Szpur, Hoag 863, Trotter, Hoag '313 and Jarrett references are cited for disclosing other multi-channel dispensers.
